

LINUX SYSTEM ADMINISTRATOR

Linux System Administrator with hands-on experience in Linux server administration, system monitoring, troubleshooting, user management, security hardening, and infrastructure management. Skilled in managing Ubuntu, CentOS, and other Linux-based environments. Experienced in configuring Apache web servers, SSH services, file systems, LVM, Docker containers, and cloud infrastructure on AWS. Strong understanding of networking concepts including TCP/IP, DNS, HTTP, and SSH. Capable of automating administrative tasks using Bash scripting and maintaining highly available, secure, and optimized Linux environments.

WORK EXPERIENCE

Linux System Administrator | Al-Nafi Cloud

- Installed, configured, and maintained Linux servers in development and production environments.
- Managed user accounts, permissions, groups, and SSH access according to security best practices.
- Configured and maintained Apache web servers and Linux services.
- Performed system monitoring, troubleshooting, and performance optimization for Linux servers.
- Managed storage using LVM and implemented backup procedures.
- Automated routine administrative tasks using Bash scripting.
- Deployed and managed Docker containers and Kubernetes workloads.
- Provisioned and managed AWS infrastructure including EC2, S3, IAM, ELB, VPC, and CloudWatch.
- Implemented CI/CD pipelines using Jenkins.
- Monitored system logs and resolved infrastructure issues to ensure maximum uptime.
- Applied security patches, server updates, and Linux hardening practices.
- Maintained technical documentation and operational procedures.

SKILLS

- VMware & Virtual Box
 - Virtualization Technology
 - Ubuntu Linux , Alma & Cent OS
 - Apache HTTP Server
- ECS
 - EC2
 - Security Group
 - Nginx
- AWS
 - NACLs
 - ECR
 - Firewall Management

EDUCATION

Matriculation	Chicago Public School Keamari	2018
DAE	Government College of Technology	2021
Bachelor in Information Technology	OTHM	2026
