

JUNIOR DEVOPS ENGINEER

Junior DevOps Engineer with practical knowledge of AWS cloud infrastructure, Docker, Linux, Git, and GitHub Actions. Skilled in provisioning and managing AWS resources such as VPC, EC2, S3, ECS, ECR, Security Groups, and Network ACLs. Familiar with building containerized applications, configuring CI/CD pipelines, and automating deployment workflows. Comfortable working with Linux systems, version control using Git, and troubleshooting application deployment issues. Passionate about cloud technologies, automation, and continuously improving infrastructure through DevOps best practices.

WORK EXPERIENCE

Junior DevOps Engineer | Al-Nafi Cloud

- Deployed and managed Docker containers.
- Performed system monitoring, troubleshooting, and performance optimization for Linux servers.
- Automated routine administrative tasks using Bash scripting.
- Provisioned and managed AWS infrastructure including EC2, S3, IAM, ELB, VPC, and CloudWatch.
- Implemented CI/CD pipelines using Git Action.
- Monitored system logs and resolved infrastructure issues to ensure maximum uptime.

PROJECTS

1. Automated CI/CD Pipeline for a Full-Stack Flask Expense Tracker

This project gave me hands-on experience with modern DevOps practices, including automation, continuous integration, continuous deployment, version control, and cloud deployment. It reinforced how CI/CD pipelines help deliver reliable and efficient software updates with minimal manual effort.

2. Containerizing a Static Company Website with Docker

Containerized a static company website using Docker and Nginx, built a custom Docker image, and deployed the application locally to gain hands-on experience with containerization and web server configuration.

SKILLS

- Auto Scaling
 - Virtualization Technology
 - Ubuntu Linux , Alma & Cent OS
 - Containerization
- ECS
 - EC2
 - Security Group
 - Nginx
- AWS
 - NACLs
 - ECR
 - Firewall Management

EDUCATION

Matriculation	The Citizen Foundation School Keamari	2018
DAE	Government College of Technology	2021
Bachelor in Information Technology	OTHM	2026
